

ICL-B0610

The **ICL-B0610** is an advanced high-speed progressive scan, fully programmable CCD camera designed for imaging applications that require high frame rates, high quality images, and powerful features and flexibility. The camera has a small size, light weight, and is built around Kodak's KAI-0340S Interline transfer CCD image sensor with a 1/3" optical format. ICL-B0610 is available with CameraLink output (PoCL compliant).

The B0610 provides an image resolution of 648 x 488 and delivers up to 137 frames per second at full resolution. The camera image processing engine is based on a high-speed, high-density FPGA, featuring programmable resolution, speed, 8 independent AOIs, binning, triggering, exposure control, line and frame time, I/O mapping, external/internal sync, AGC, AEC, Auto Iris, transfer function correction, user LUT, and Defective and Hot Pixel Correction (DPC, HPC).
